

We want to think **GREEN** in our family. My family wants to be more environmentally conscious. As a family _____,
list family members

we commit to doing the following things:

- **Visit** a city, state, or national park to spend time outdoors. Go to those outdoor places we often drive past.
- **Have** an electronic-item-free day once a month—unplug for the day to help cut down on the use of electricity.
- **Plant** a flower box, a tree in the yard, and/or a garden. Make a commitment to plant seasonally and be greener all year.
- **Carpool** whether it is to soccer or school, share a ride with a friend or classmate.
- **Participate** in our community's recycling program—from plastic to paper to aluminum and those special days for large electronic items or paint.
- **Be** a community volunteer—from helping with trash pickup or a bike race. Spend time outside helping our insides.
- **Discover** the outdoors near our home. Determine a place where we can play near our home
- **Start** a compost pile at our house.
- **Reconsider** all the periodicals that come to our home. Think about cutting our paper usage by subscribing to some of them online.
- **Agree** to change the family calendar to provide for unstructured time for spontaneity and "just 'cause" things to happen together as a family.
